Idea

"Clean code always looks like it was written by someone who cares."

By Robert C. Martin aka 'Uncle Bob'.

The main idea is everyone having the acquisition of skills and expertise in the area of information technology for all Programming Languages.

A place that you can find anything you want and "master" your knowledge.

A multi-Profile site that can host both Students and Teachers with categorization in each technology enriched with educational material such as Videos and EBooks.

Target Group

As a Student Candidate:

You don't need programming experience, age limit or skills.

Just passion to learn

As a Software Development Instructor :

Contagion, Knowledge, Daily

Updated and interest in teaching are the main skills

Technologies

Front-End:

- HTML5
- CSS3
- Bootstrap
- Javascript
- JQuery

Libraries :

- AutoMapper
- JQuery Datatables
- Bootbox
- AutoFac
- FluentEmail

Back-End: .Net Framework MVC

Database: SQL Express 2019

Problem to solve

"Looking for something? Google it"

You can search anything you want through Internet,
but is this infoxication for you?

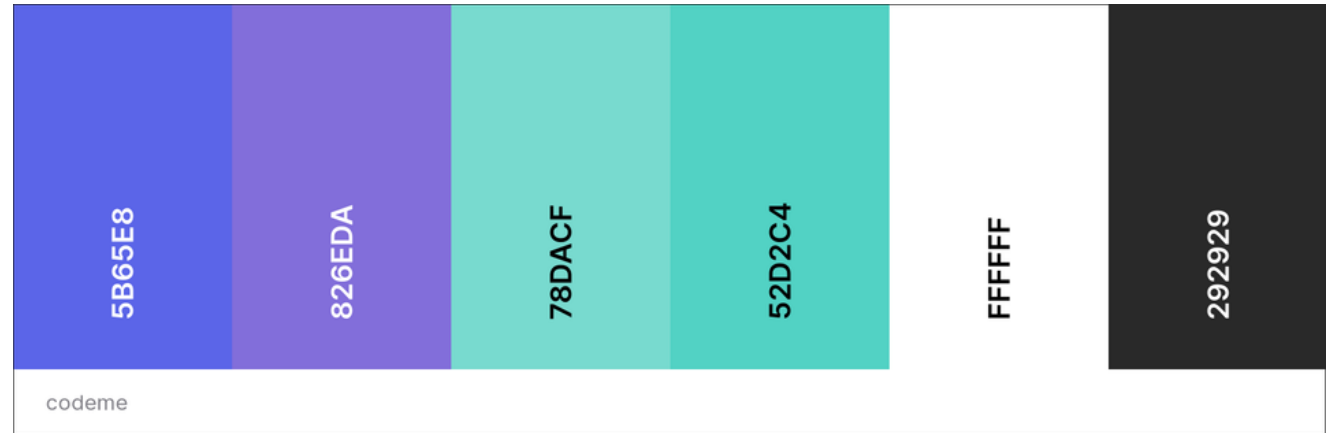

Here is a problem we call to bypass in this site:

- Educational Materials for everything you need
- Effective teachers showing you step by step
- Fully updated Information
- You can READ and VIEW to learn
(Videos and EBooks)
